

ZEO-TOX™

Gentle, Natural Detoxification

Zeolites have been used for thousands of years and are known to bind with mercury, lead, aluminum and other heavy metals, as well as chemical toxins, pesticides, herbicides and plasticizers.

Breakthrough in Chelation

Unlike other chelating agents, Zeo-Tox™ aerosol detoxifies without removing essential nutritional minerals.

Suggested Use:

5 Sprays of Zeo-Tox™ 2-3 times daily; higher dose up to 10 sprays, 4 times daily, or as indicated. Best when taken simultaneously with Argenta™.

Zeolite Binding by Adsorption

Depending on the size of Zeolite pores, they can adsorb molecules readily, slowly, or not at all, thus functioning as "molecular sieves" -- adsorbing molecules of certain sizes while rejecting larger ones. Species with a kinetic diameter which makes them too large to pass through a Zeolite pore are effectively "sieved."

Zeolite molecular sieves act like sponges. Zeolite's unique 3 dimensional crystalline lattice structure has channels and cavities which offer an enormous surface area—up to 800 square meters per gram. For reference, the EPA has established that the average body surface area for a 70 kg man is 1.9 square meters. In simple terms, **the total surface area of 2.5 mg of Zeolite could exceed the body surface area of an average 150 pound person.**

Zeo-Tox™ Benefits

Supports multiple detoxification protocols. The chelating, Ion-Exchange & Absorbent Properties of Zeolite are selective for:

1. Heavy Metals (Hg>Pb>Cd>As>Al)
2. Endogenous Toxins & Herxheimer Triggers
3. Environmental Chemicals
4. Free Radicals - Supports Other Antioxidants

Additional Benefits:

- Supports systemic pH Balance
- Supports nutrient absorption
- Supports Healthy Systemic Detoxification
- Clinical Reports of >1000% increase in urinary elimination of heavy metals

PURE SCIENTIFIC

PHYSICIAN-DESIGNED BASED ON SCIENCE

Pure Scientific formulations are physician-designed, evidence-based dietary supplements formulated by Jerry L. Schlessler, ND, DC, CNS who has over 30 years of experience designing clinical products for discriminating healthcare professionals.

Pure Scientific formulas are supported by published research in peer-reviewed, scientific journals, National Academy of Science & Institute of Medicine nutritional guidelines & manufactured to meet USP standards for dietary supplements to ensure optimal purity & quality.

ARGENTA™

Advanced High Potency Silver Aerosol

Argenta™ supports optimal health by addressing chronic immune and metabolic stress due to accumulated toxins and microbial imbalances.

Most Potent Silver Available - 200 PPM

Aerosolized Nano Silver Spray

Argenta™ is different from other silver containing or "colloidal silver" products because of its **Sub-micron particle size** and **lower surface tension** achieved by our "Ultra-Wet™" technology.

What Makes Argenta So Unique & Effective?

Argenta™ delivers **200 parts per million** of unique energized silver particles that range in size from **0.04 microns to the nanometer range**, confirmed by SEM. At the nano scale, the proportion of surface atoms is increased in comparison with internal atoms. Surface atoms behave differently from internal atoms **because they have a higher energy state**. Because chemical reactions take place between atoms & molecules at the surface, catalytic activity of nano materials can have a dramatic effect. Other properties, such as magnetism and electrical conductivity can change substantially in the nano range due to collective effects and **quantum size effects** arising from confining electrons in nanometer sized structures.

43% Lower Surface Tension = Better Response

The proprietary "Ultra-Wet™" transport medium provides 43% lower surface tension than regular distilled water. **The combination of sub-micron particle size and reduced surface tension delivers superior dispersion and rapid response when needed.**

Suggested Use:

5 Sprays of Argenta™ 2-3 times daily; higher dose up to 10 sprays, 4 times daily, or as indicated. Best if taken simultaneously with Zeo-Tox™.

ORAL HEAVY METAL DETOX WITH NANO-SIZE AEROSOLS*

Committed to Practitioners

Pure Scientific is a science-based professional line designed exclusively for licensed healthcare practitioners.

Why Choose Argenta™?

- * Independent Safety Studies
- * **Highest Potency of all Silver Hydrosols at 200 PPM**
- * Recommended By Physicians In Over 15 Countries
- * Particle Size from 0.4 microns to nanometer range
- * "Wetter than water" - Ultra-Wet™ system promotes more rapid delivery & response.
- * No Preservatives Required: Argenta's™ anti-bacterial & anti-fungal properties have been confirmed in preservative challenge tests.
- * Supports Healthy Systemic Microbial Balance
- * Effective Adjunct to Immune Protocols
- * Noticeable Biological Response
- * No Preservatives required, based on in vitro challenge tests
- * Supports Healthy Immune Response

Benefits of Argenta™ & Zeo-Tox™

- * **100% Natural**
- * Convenient & Easy to Use Oral Spray
- * Low Risk Of Product Contamination
- * Ultra-Wet™ System for Rapid Response
- * No Preservatives, Artificial Colors or Flavors
- * No Alcohol
- * Not Irradiated
- * Well Tolerated
- * Pass Naturally out of the Body
- * Noticeable Biological Response
- * Effective Even at Low Dose
- * Detoxifies & Cleanses

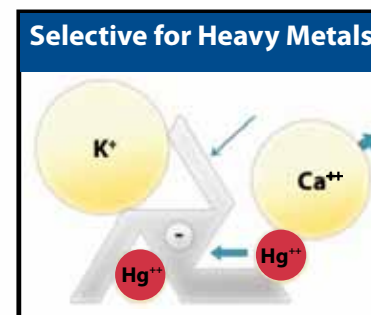

*These statements have not been evaluated by the Food & Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease.

Why Choose Zeo-Tox™ clinoptilolite?

- * **In comparison to acid-based chelators, Zeolite is highly selective for heavy metals** like mercury & lead with less attraction to vital minerals like calcium, potassium & selenium.
- * Zeolite is Classified as **GRAS** (Generally Recognized As Safe) By FDA
- * Zeolite's Stable Structure is **Not Broken Down in the GI Tract**
- * **Ultra-Pure:** In comparison to other Zeolite products, Zeo-Tox™ has undergone extensive processing to remove heavy metals & other toxins which are present in all natural Zeolites.
- * **Increased Heavy Metal Elimination:** By clearing the pores & cage structures, the binding capacity of Zeo-Tox™ is optimized in comparison to other Zeolite products. This may partly explain up to **54 times the elimination of Mercury shortly after administration of Zeo-Tox™**.
- * **Highest Surface Area:** Zeo-Tox™ is specially processed to significantly reduce the average particle size in comparison to other Zeolites. This results in an exponential increase in contact surface area for better binding capacity & increased toxin elimination.
